

## A MAD LIBS PACKAGE

VERSION 1.1  
ARUN DEBRAY  
NOVEMBER 25, 2015

Mad Libs are a(n) \_\_\_\_\_ game played by creating a document or story with cer-  
tain words missing, replaced with lines guiding the \_\_\_\_\_ to fill them in. One player  
\_\_\_\_\_ the others for words to fill in the blanks, and then reads them \_\_\_\_\_ to  
other \_\_\_\_\_ in the room. Often, people play this game at \_\_\_\_\_ .  
(verb) (noun) (adjective) (plural noun)

For example, \_\_\_\_\_ the example, “I got a \_\_\_\_\_ , baby, and I’ll  
(verb) (noun)  
write your name.” The first player asks the rest for a noun, and gets “teapot” in response; so the final  
\_\_\_\_\_ is “I got a teapot, baby, and I’ll write your name.”  
(noun)

One \_\_\_\_\_ , I realized that Mad Libs didn’t exist in ~~TEX~~TEX. This \_\_\_\_\_ prob-  
(noun) (adjective)  
lem needed to be fixed, so I \_\_\_\_\_ this package, to make writing Mad Libs stories  
(verb)  
much more \_\_\_\_\_. Moreover, thanks to the magic of the hyperref package, it’s possi-  
(adjective)  
ble to generate PDFs that can be filled in. Go ahead, write some \_\_\_\_\_ in the blanks  
(plural noun)  
on this page!

**Commands.** Here are the commands you can use.

- Simple parts of speech: `\Noun` creates \_\_\_\_\_ , and you can call `\Verb`,  
(noun)  
`\Adjective`, `\Adverb`, `\Preposition`, and `\Interjection`, which have the same effects.
- Modified parts of speech: `\EdVerb` creates \_\_\_\_\_ , `\IngVerb` produces  
(verb (ed))  
\_\_\_\_\_, and `\PluralNoun` generates \_\_\_\_\_.  
(verb (ing)) (plural noun)
- Finally, a few commands aren’t exactly parts of speech. `\Number` produces \_\_\_\_\_ ,  
(number)  
and `\Exclamation` creates \_\_\_\_\_. Then, `\PersonInRoom` makes \_\_\_\_\_ ,  
(exclamation) (person in room)  
and `\Place` creates \_\_\_\_\_.  
(place)
- If you want to write your own Mad Libs categories, use `\PartOfSpeech{word}`. For example,  
`\PartOfSpeech{binky}` produces \_\_\_\_\_.  
(binky)
